

THE AERITAE POCKET GUIDE TO:

LEVELING UP YOUR APPDYNAMICS SOLUTION

*A 5-day program to realize the full value of
your AppDynamics implementation*

AERITAE helps clients keep moving forward by maximizing performance, improving operations, and developing innovative new service solutions.

We leverage the ServiceNow and AppDynamics ecosystems to accelerate and sustain those gains.

DAY 1

ENVIRONMENT & CONTROLLER REVIEW

Day 1:

Is your AppDynamics deployment sized and configured appropriately?

Look at how you're using your AppDynamics instance.

- Check agent versioning and make sure the agents are up to date.
- Look at your version control strategy and whether it employs automation.
- Prep your controller host and validate how many metrics the controller is grabbing per minute.

DAY 2

APPLICATION
DEPLOYMENT
STRATEGY

Day 2:

Is your AppDynamics monitoring strategy enabling application visibility?

Analyze your business transaction/service endpoint configuration strategy.

- Assess any visibility gaps.
- Review tier & node naming and grouping strategy.
- Audit user & group privileges to ensure appropriate access rights.

DAY 3

TRANSACTION TUNING

Day 3:

What can be tuned to make your AppDynamics deployment more valuable?

Look at what level of granularity you need.

- Assess your thresholds.
- Assess whether you have health rules that are violating themselves.
- Ask, are we ignoring alerts?
- Look at error detection. Are you excluding errors? Why?
- Evaluate data collector usage. (Capturing additional HTTP values or invoking a class method to capture relevant values.)

DAY 4

OPERATIONAL ASSESSMENT

Day 4:

How well is your AppDynamics implementation integrated with your operational processes?

Look at the processes surrounding your tool set.

- Are your alerts/events actionable?
- Are people accountable for taking action?
- Is the toolset integrated with Incident Management?
Change Management? Capacity Management?

DAY 5

DASHBOARD ANALYSIS AND REPORTING

Day 5:

Are your AppDynamics dashboards providing valuable data for business decisions?

Can you answer the following questions about your performance data?

- What data is being collected?
- How is the data aggregated?
- Who is the data passed/presented to?
- How frequently is presented?
- Is the data actively informing decision-making?
